**BRAVO ELECTRIC VEHICLES WELCOMES
BEST WAY MOTORS AS A NEW AUTHORIZED DEALER**

Vero Beach, Florida - November 11, 2008 - Bravo Electric Vehicles proudly welcomes Best Way Motors, of Vero Beach, FL, to its nationwide network of electric scooter dealers.

Best Way Motors owner, Blair (Duke) Burns, believes in the power of positive change and is working to make a difference that will benefit the environment today by selling electric scooters. Best Way Motors offers sales and support service to the state of Florida.

Best Way Motors now offers three Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter. Last but not least, the three-wheeled Bravo EVT-345, powered by two high-efficiency hub motors, provides an extra sense of stability.

Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter's charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Best Way Motors to learn more.
