**BRAVO ELECTRIC VEHICLES WELCOMES ECOMOTION  
AS A NEW AUTHORIZED DEALER**

**Portland, Oregon May 21, 2008** - Bravo Electric Vehicles proudly welcomes Ecomotion to its nationwide network of electric scooter dealers.

Ecomotion is an all-electric car dealership offering new alternative fuel vehicles and Smart Way certified used vehicles for anyone wishing to take greener steps for their transportation needs. Eco-friendly vehicles include: electric cars, hybrids, Ethanol cars, Biodiesel cars, electric scooters, electric ATV's, Zapp, Smart Cars and EMG's. Under the management of Steve Sharer, Ecomotion has quickly become one of the top-selling electric vehicle dealerships in the country since its grand opening in September 2007.

Ecomotion offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Ecomotion to learn more.
