**BRAVO ELECTRIC VEHICLES WELCOMES  
ELECTRIC CAR OUTLET AS A NEW AUTHORIZED DEALER**

**Scottsdale, Ariz. - December 3, 2008** - Bravo Electric Vehicles proudly welcomes Electric Car Outlet LLC (ECO) to its nationwide network of electric scooter dealers.

Located in Scottsdale where the Southwestern climate is ideal for electric transports, ECO promotes a "green" lifestyle to customers through their exclusive line of environmentally-friendly products including a wide selection of electric scooters, golf carts, neighborhood vehicles, commercial vehicles and trucks. ECO also supplies parts and provides service to these vehicles.

Electric Car Outlet offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter's charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Electric Car Outlet to learn more.
