**BRAVO ELECTRIC VEHICLES WELCOMES GREEN RIDES  
AS A NEW AUTHORIZED DEALER**

**Campbell, California June 2, 2008** - Bravo Electric Vehicles proudly welcomes Green Rides, of Campbell, CA, to its nationwide network of electric scooter dealers.

Conveniently located in the downtown Vasona Light Rail station, Green Rides offers a great variety of electric cars, scooters, golf carts and ATV's. Co-owners Todd Madeiros and Mike Curtis describe their business as good clean fun through a variety of electric and low-emission vehicles.

Green Rides now offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter's charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Green Rides to learn more.
