**BRAVO ELECTRIC VEHICLES WELCOMES MOTORWORKS CLEAN VEHICLES
AS A NEW AUTHORIZED DEALER**

Amityville, New York July 30, 2008 - Bravo Electric Vehicles proudly welcomes Motorworks Clean Vehicles to its nationwide network of electric scooter dealers.

Originally established in 1990 in Westbury as an engine replacement workshop, Motorworks just recently relocated to Amityville to develop a customized electric car dealership. Motorworks owner and president, Gary Birke, believes in the power of positive change and is working to make a sustainable difference that will benefit the environment today and for generations to come. Motorworks offers sales and support service to the New York metropolitan area with a complete line of electric vehicles including trucks, vans, cars and utility vehicles.

Motorworks Clean Vehicles now offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Motorworks Clean Vehicles to learn more.
