**BRAVO ELECTRIC VEHICLES WELCOMES SCOOTERS OF BOISE  
AS A NEW AUTHORIZED DEALER**

**Boise, Idaho July 30, 2008** - Bravo Electric Vehicles proudly welcomes Scooters of Boise to its nationwide network of electric scooter dealers.

Scooters of Boise started out as a part-time business in 2005, and then quickly became a full-time occupation for co-owners Kathy Navin and Kitty Smith. After three years of continued success, Scooters of Boise opened a second store in Eagle last month. Both locations offer a wide variety of scooters and scooter accessories.

Scooters of Boise now offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by one of Scooters' locations to learn more.
