**BRAVO ELECTRIC VEHICLES WELCOMES TOY ZONE, LLC
AS A NEW AUTHORIZED DEALER**

Phoenix, Arizona June 10, 2008 - Bravo Electric Vehicles proudly welcomes Toy Zone to its nationwide network of electric scooter dealers.

Founded in 1999, Toyzone, LLC is a family-owned business providing high-quality products at an affordable price. Toyzone offers a wide range of off-road recreational vehicles such as ATV's, dirt bikes, street bikes, go-karts and choppers.

Toy Zone offers two Bravo EVT electric scooters that allow drivers to skip the pump in their everyday commute. The Bravo EVT-168 combines retro styling with technologically advanced design and engineering. The modern, aerodynamic look of the Bravo EVT-4000e plays off the innovative technology used to power the scooter.

Both Bravo EVT scooters feature efficient brushless electric motors to quietly power your commute with absolutely zero emissions. No carbon. No smog. With speeds of up to 30 miles per hour and an approximate range of 35 miles, a Bravo EVT scooter is perfect for local commutes and running errands around town.

As gas prices continue to rise, Bravo EVT scooters present an opportunity to drive past the gas pump, minimize your carbon footprint and help reduce traffic congestion. Taking only a few hours to charge, the Bravo EVT scooter charger plugs into any standard household outlet. They are fully DOT approved and don't require a motorcycle certification.

Stop by Toy Zone to learn more.
